

JANOME

Continental M7 Professional

*More room
for creativity*

MEETING YOUR NEED *for speed & strength*

Another industry first, the CM7P is the fastest sewing top loading home sewing machine available. With the adoption of a DC brushless motor, you will be able to enjoy 1,300 stitches per minute without having to give up on strength or stability. Add in the full metal frame and Janome's high standards for vibration suppression and you can be assured of a pleasurable, smooth and high-performance sewing experience.

Ample WORK AREA

More room for larger projects. The CM7P provides 343mm (13.5") to the right of the needle and 452mm (17.81") of total work area. The needle area is sleek and trim so you can easily see as you work. Add the extra wide extension table, 680 x 400mm (26.77" x 15.75"), and you have even more workspace.

STITCHES, FEET & *extras*

The CM7P has an extensive and generous package of all the necessities. Choose from 400 stitches including 52 hand-style stitches. Choose from an amazing array of 22 standard feet and 32 optional sewing accessories. The Extra-Wide table, with a built-in accessory storage drawer, gives support for free motion quilting and other large projects.

SUPERIOR NEEDLE THREADER & HIGH VISIBILITY

Threading couldn't be easier! Set your thread, push the lever on the left side, release and sew! This time saving feature allows you to get sewing faster. Its advanced design feeds the thread through the eye of the needle with precise accuracy every time. The streamlined machine head provides excellent visibility around the needle area.

CONVENIENCE AT YOUR FINGERTIPS

The Easy Convenience Features let you get more out of your sewing time. The most important functions are perfectly placed for effortless access. Start/Stop button, Reverse, Locking Stitch, Needle Up/Down and Thread Cutter are all there. And most importantly: the Automatic Presser Foot Lift.

BRIGHT & VIVID VIEW, LIGHTING & SCREEN + CLOCK

Using the large, HD 7" touchscreen is like working on your favorite tablet. 9 bright white LED lighting illuminates your sewing space with shadow-free coverage. This is the first Janome with a clock on screen.

INDEPENDENT BOBBIN WINDING MOTOR

With an independent bobbin motor, there is no need to stop your sewing. Set up your bobbin, push the Bobbin Winding button and keep sewing your seams while the machine simultaneously winds your bobbin.

STABLE RUNNING

This is a reliable and robust sewing machine. With an Industry First for single-needle home sewing machines, the CM7P comes with a DC brushless motor that offers greater efficiency. The main shaft is equipped with ball bearings which provide low torque, making it powerful and stable, even when running at high speeds.

PRECISION STITCH ADJUSTMENT

The tactile exterior dials often preferred by active sewists include multi-function rotary encoder dials for stitch width, length and additional functions.

EXTRA LARGE SEAMLESS FLATBED WORKSPACE

The seamless, heavy-duty, powder-coated, all metal flatbed offers an uninterrupted, large sewing area with 343mm (13.5") to the right of the needle. With a 140mm (5.51") workspace height, you'll complete any sewing project with ease.

AUTOMATIC ONE-TOUCH NEEDLE PLATE CONVERSION

No screws or tools necessary! Simply push the on-screen button to release the plate and place a new one in place. The CM7P will automatically retract the new plate into place using a magnetic system. The CM7P comes with three standard needle plates: zigzag, straight stitch and the Professional Grade HP plate.

INTELLI-FEED

The new Intelli-Feed system is designed to keep the feed dogs down and out of the way, so that you can easily position your fabric where you want it to be. As soon as you start sewing, the feed dogs come up and perfectly grab the fabric.

ACUFEED FLEX (ELECTRONIC)

AcuFeed Flex is an integrated system that perfectly guides your fabric from the top and the bottom. Perfect for quilts, plaids, and any sewing that requires precise control. Easy on screen adjustment.

HELPING YOU *do more*

Need a little inspiration to spark your imagination and get the most out of all of those sewing machine features? AcuSpark is just a scan away! Our new, exclusive Janome app will provide you with tutorials, how-to videos and more by simply using your smart phone or iPad to scan the QR code on the screen. No matter what application you are working on, help is just a scan away.

WE'VE GOT *the power*

Engineered with a newly redesigned motor, the CM7P provides you with powerful penetration and needle force, allowing you to easily tackle heavyweight home dec fabrics like canvas in order to make your decorating dreams come to fruition.

AVOIDING EMPTY *bobbin pitfalls*

For everyone who has sewn a long seam, only to find that your bobbin thread ran out after the first few inches, our advanced Optical Bobbin Monitoring System is for you. New Janome technology allows the CM7P to constantly watch your bobbin thread supply while sewing, so that you will receive a warning as soon as the bobbin thread gets low, not when it's too late at the end of your seam.
